

This architectural elevation drawing shows a long, single-story building facade. The main walls are clad in vertical wood slats. On the left, a section of the wall is finished with light-colored bricks, featuring a glass door with a dashed line indicating its swing and a multi-paned window above it. In the center, a tall brick chimney rises from the roofline. To the right of the chimney is a large, dark-colored garage door with a red outline and a dashed line showing its opening mechanism. Above the garage door is a small horizontal window. The ground in front of the building is indicated by a hatched pattern, and a small green bush is visible on the far left.

This architectural section drawing illustrates a building with a sloped roof and an external staircase. The roof is supported by a series of vertical structural elements. A horizontal dimension line at the top indicates a length of 6 960. A red dimension line on the right indicates a height of 3 000. The building features a large, light-colored rectangular volume on the right side. To the left, there is a smaller, textured rectangular volume. The ground is shown with a hatched pattern, and there are green areas representing vegetation. The drawing is a technical representation of a building's internal structure and dimensions.
